## **ORDER FORM - X25**

**We are transitioning to a new bow wing version of the 25 foot lightweight boat. We have quite a long backlog and have promised all of the old model that we are able to build at this time. The new boat will have the same hull shape and feel as the current version, but with a bow mounted wing rigger like the new 26.**

**Please feel free to call to discuss the availability or the new version or of used models of the current boat.**
